# About Us

Camos-UK is a trading name of Trailer Vision Limited, an independent UK based company established in 2009. We work closely with Camos Korea who have been manufacturing vehicle based cameras and related electronic products for more than 30 years. Camos directly supply many manufacturers in all areas of the world. Camos-UK manage the UK market and other English speaking markets around the world.

We supply all industries including Aggregate, Agriculture, Commercial, Equestrian, Leisure and Plant with unique and innovative vehicle safety systems.

The company's founder is a qualified electronics and quality assurance engineer with a wealth of practical experience. Both he and the whole company take pride in delivering the highest levels of customer service.

Camos operate at the forefront of 360° Surround View (SV) technology and Camos-UK offer the UK's largest range of SV systems and can now supply fully Digital HD systems, including 3D and Digital DVRs.

Systems are offered with a large selection of options (including Digital Wireless) and can be tailored to any particular requirements.

# Surround View

## The Ultimate in Safety Systems for Vehicles and Machines

Featuring done-like views and utilising four 720p WDR cameras, Omni-Vue™ Surround View systems eliminate all blind spots.

The latest 3D system includes built-in recording, as well as additional/user configurable views, representing excellent value. Recording can be seen as essential in the driving conditions of today, with more vehicles than ever before on the road.

Systems are all calibrated by our in-house team, meaning every installation is bespoke and tailored to customer requirements. Calibrations, including remote calibrations via email ensure systems are precise, show the distances between hazards and the vehicle accurately.

# How Does Surround View Work?

Surround View systems utilise 4 ultra-wide angle cameras that are connected to an Electronic Control Unit (ECU).

The ECU 'stitches' the images together to provide the driver with a complete/360° view around the vehicle in a single image.

Each installation includes a calibration phase, meaning every system is calibrated to the vehicle it is installed on to. Because of this, users can be sure that the scale of the vehicle shown on screen is accurate. This is particularly useful when trying to manoeuvre in areas with very little space.

It is not just the bird's eye view that is calibrated. Each individual camera view, such as the left hand camera view that shows when indicating, is also tailored to each vehicle.

Omni-Vue™  
3D working.

## Omni-Vue™ 360° Digital HD

Omni-Vue™ 360° Digital HD helps to reduce the likelihood of accidents by providing users with a bird's eye view in addition to individual camera views.

### For Motorhomes

**A3328 - With a 7 inch Digital HD Monitor: £1795**

**A3501 - With Two 7 inch Digital HD Monitors: £2045**

**A3421 - With a 10 Inch Digital HD Monitor: £1945**

### For Caravans

**A1094 - With a 7 inch AHD Wireless Monitor: £1645**

## Omni-Vue™ 3D HD

Based on the proven Omni-Vue™ 360° Digital HD, Omni-Vue™ 3D is the latest surround view system.

In addition to having all of the features of its predecessor, the system also has a built-in recorder and many more views.

### For Motorhomes

**A3534 - With a 7 inch Digital HD Monitor: £1995**

**A3536 - With a 10 Inch Digital HD Monitor: £2145**

### For Caravans

**A1127 - With a 7 inch AHD Wireless Monitor: £1845**

## View Your Pets or Garage

Omni-Vue 3D also provides customers with the option of adding up to two additional interior cameras.

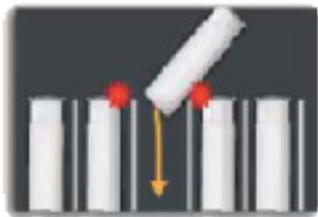

Interior cameras can be useful to keep an eye on the contents of your garage or on pets.

**One Interior Camera: £149**

**Two Interior Cameras: £179**

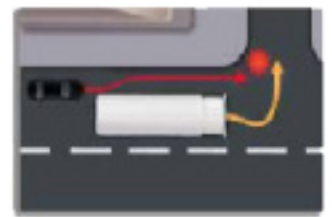

Parking Made Safer and Easier

Manoeuvre Confidently

Elimination of Blind Spots

A Range of Views to Choose From

Omni-View™ systems are suitable for motorhomes and caravans of all sizes.

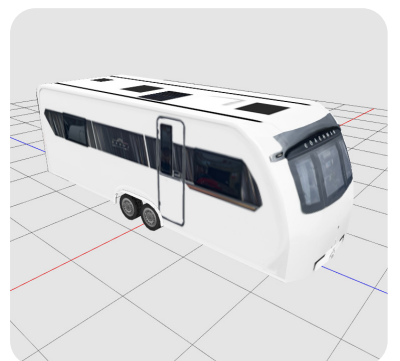

The monitor shown to the right is supplied for caravan use.

# Bespoke 360° Graphics

Our team is able to customise a selection of 3D models, ensuring that the vehicle displayed on the Omni-View™'s screen is representative.

Below is a selection of designs from past installs.

# Digital Recorders

With the rise of 'crash for cash' schemes, our range of DVRs and accident recorders are an excellent addition to any of our camera systems.

Camos recorders are compatible with most of the cameras and systems that we hold in stock and are supplied to a range of clients, from large OEMs and fleets to retail customers.

A must-have for complete peace of mind.

## 2 Channel Digital DVR

The latest dual channel digital DVR captures high definition footage reliably and uses SD cards for storage so footage can be viewed easily.

- D3451 - 32GB SD Card Storage: £324**
- D3487 - 128GB SD Card Storage: £354**
- D3488 - 256GB SD Card Storage: £384**
- D3489 - 512GB SD Card Storage: £414**

## 4 Channel Digital DVR

The latest quad channel digital DVR captures high definition footage reliably and uses SD cards for storage so footage can be viewed easily.

Because this DVR is capable of recording four cameras at once, it is particularly useful when pairing with surround view.

- D3452 - 32GB SD Card Storage: £594**
- D3457 - 128GB SD Card Storage: £624**
- D3468 - 256GB SD Card Storage: £654**
- D3469 - 512GB SD Card Storage: £684**

# Analogue Recorders

## **DR-220**

A high-quality HDR/WDR commercial spec forward-facing accident recorder.

**R3035 - 16GB SD Card Storage: £300**

**R3261 - 64GB SD Card Storage: £330**

**R3427 - 128GB SD Card Storage: £360**

## **DR-120 2 Channel DVR**

The DR-120 is a dual channel recorder that utilises SD card memory that facilitates the easy movement of data.

**D3027 - 16GB SD Card Storage: £325**

**D3438 - 64GB SD Card Storage: £355**

**D3439 - 128GB SD Card Storage: £385**

## **DR-400N 4 Channel DVR**

The DR-400N is a quad channel recorder that, while a great addition to any of our applicable systems, shines when used in conjunction with surround view.

**D3021 - 128GB SSD Storage: £594**

**D3022 - 256GB SSD Storage: £624**

**D3023 - 500GB SSD Storage: £654**

**D3024 - 1TBGB SSD Storage: £684**

# Rear View Systems

Suitable for caravans and motorhomes

## Twin Lens Camera System

The Twin Lens camera system uses two lenses to provide a 'look-back' view when driving and a 'look-down' view when reversing.

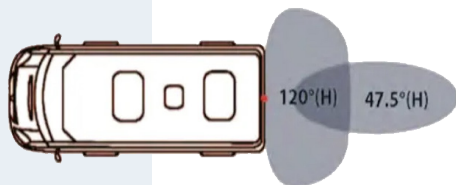

- Available in black or white
- IP69K rated cameras
