

SURROUND VIEW 360° CAMERA SYSTEMS

THE ULTIMATE IN VEHICLE SAFETY SYSTEMS

Surround-View (SV) systems provide the driver with a complete 360° view around the vehicle, or trailer.

The 'split screen' monitor displays:

- A permanent 'look down' view from above, showing the vehicle and its surroundings
- Automatically triggered individual camera views (left/right camera when indicating left/right; rear camera when reversing)

Four ultra-wide angle cameras (front, left, right and rear) are connected to an Electronic Control Unit (ECU), which 'stitches' the images together to form a seamless 'look down' view.

The benefits of Surround-View include:

- Elimination of all blind spots
- Clear visibility of vulnerable road users and hazards
- Reduced likelihood of accidents and incidents
- Evidence recording (when specified with an optional DVR - see overleaf for details)

WHY 360° SV?

- ✓ Relaxed and safer driving / towing experience
- ✓ Bespoke views / calibration options
- ✓ Eliminates all blind spots
- ✓ Three year warranty
- ✓ 'Refer a Friend' reward scheme

Omni-Van™ 360°

- 12 volt system
- VGA cameras
- 7" dash/mirror-mounted monitor
